**BUILDING and CONSTRUCTION PERMITS and INSPECTIONS**

	<b><u>Section 1</u></b>	
<b><u>Dept</u></b>	<b><u>Description</u></b>	<b><u>Fee</u></b>
Community Development	<b>Section 1: Construction Permit Fees</b>	
	Construction permit fees for new construction, additions, & accessory structures shall be calculated by the following method:	
	1) Multiply the total square footage of the structure by the applicable square footage construction cost set out in Table A or A2 (see tables on the following pages).	
	2) Determine the estimated actual construction cost.	
	3) Apply the greater of the above values to the fee table set out as Table B1 (Commercial) or Table B2 (Residential), whichever is applicable (see tables on the following pages).	
	Construction permit fees for remodels, alterations, and demolitions shall be calculated by applying the estimated actual construction cost to Table B1 for commercial projects and Table B2 for residential projects (see tables on the following pages).	
	The Codes Administrator shall determine the applicable cost per square foot valuation in the tables for structures and uses not specifically listed by using the most analogous valuation.	
	<b><u>BVD Adjustment:</u></b> The construction cost table set out below reflects the BVD as published by the ICC. Annually in the second quarter and without any further Governing Body action, the construction cost table shall be automatically adjusted to reflect the most recent BVD published by the ICC. Any adjustment made shall become effective thirty (30) days following publication in the City's official newspaper. The new construction cost table shall also be posted in a conspicuous place at City Hall. The construction cost table may be adjusted by resolution at any other time as may be deemed appropriate by the Governing Body.

**STORMWATER FEES**

<u>Dept</u>	<u>Description</u>	<u>Fee</u>
Municipal Services	Stormwater Service Charge - <b>rate effective for November 2015 &amp; future tax bills</b>	Annual charge of \$109 per EDU (collected through tax bill)
Community Development	Stormwater System Development Charge (Capital Charge) - <b>rate effective April 13, 2017*</b>	\$1,066 per Equivalent Dwelling Unit (EDU)
<p>*The stormwater system development is assessed at the time of permit issuance. The system development charge varies, depending on the amount of impervious area within a development project. This fee is used to provide regional system control to flooding that is likely to result from a 1% rain event. In essence, it is the development's cost of their capacity in the City's drainage system. The fee is calculated at \$1,066 per equivalent dwelling unit (EDU). In the case of single family residential property, an EDU is one single lot. For all other development types, an EDU is calculated as 2,750 square feet of impervious area. For example, 30,000 square feet of impervious area would equate to 10.9 EDUs (30,000 divided by 2,750 = 10.9). Credit against the system development charge shall be given for building permits authorizing construction on a lot shown on a final plat or final plan that was approved prior to April 20, 2004. In addition, a credit shall be given for any building permit authorizing construction on a lot shown on a final plat or final plan which provides retention or detention for the 1% rain event, as authorized by the City with development approval.</p>
